

California-based Pertexa Healthcare Technologies and Medica Billing Solutions of Bakersfield, CA Form Partnership

Pertexa Healthcare Technologies of Ridgecrest, CA is pleased to announce that it has agreed to partner with Medica Billing Solutions of Bakersfield, CA. Pertexa and Medica will apply the latest medical software technology to enhance Medica’s Revenue Cycle Management Program. Medica will utilize the country’s leading medical productivity tool, Radekal, to enhance sustainable revenue performance to its entire client base. In addition, Medica will expand its offering beyond Revenue Cycle Management to include PM software solutions, medical productivity software, advanced medical devices and peripherals.

Medica was founded in 2003 by Scott Cooper and Jeff Thorn and has grown into one of the premier medical billing companies in the U.S. While the company has its roots in central California, it has grown into a company with a comprehensive national presence.

“We are pleased to team with Pertexa to bring the latest medical productivity software to our current, and future, clients”, said Scott Cooper. “This partnership will increase our company’s growth and increase the number of employees that we will need to hire in Bakersfield over the next couple of years. Interestingly, not only were we able to find the best medical software technology in the U. S., we found it in Kern County. Working with Pertexa will allow us to greatly expand our product offering throughout the U.S. market”.

“Pertexa has been seeking a strategic partner in California for a number of years. We are glad that we waited to find a perfect match for us, in Medica” according to Kishor Joshi, CEO of Pertexa. “We both share the same strategic vision and focus: To apply advanced technology to enhance the productivity for the benefit of our clients and shareholders. Over the last few months, Pertexa has signed a number of important agreements, however, this I believe is the most significant”.

About Pertexa:

Pertexa, Inc. is a next-generation medical technology company headquartered in Ridgecrest, California that creates and distributes advanced technology including RITA and RADEKAL, the nation’s leading Physician’s Productivity Tool, which has been shown to increase productivity by 30%. By combining both hardware and app development for worldwide medical use, Pertexa is an innovative brain trust, advancing disruptive transformational technologies for an evolving healthcare environment.
