

Telemedicine Game-Changer Pertexa Announces Winning Technology Partnership

Pertexa leads innovations within telemedicine by integrating app-style services with its robotics technology. Oakland Raider Super Bowl Champion Burgess Owen's, Company Empowering Healthcard Solutions, LLC Joins effort.

Whether vacationing in the Grand Canyon or hiking in the mountains of the high sierras, medical emergencies can occur at any time, but access to specialist-level consultations can mean the difference between life and death – but thanks to new technology, access to specialists can now be offered in myriad locations and situations.

Pertexa, based in Ridgecrest, CA, has been developing technology that would allow patients to see a doctor immediately in both of those scenarios, and in some cases even have the doctor prescribe medication, from your smart-phone, no matter where you are. Telemedicine and telehealth apps are dramatically making healthcare more convenient, less expensive and more preventative.

Pertexa Healthcare Technologies is working in partnership with Empowering Healthcard Solutions, LLC (EHS) to apply the latest medical software and robotics technology from Pertexa with the latest medical smart card technology (Med-O-Card) from EHS. The combined product offering will enhance the delivery of healthcare services to underserved urban and rural communities. This first to market integrated turn-key solution will focus on the delivery of this much needed healthcard through the use of state of the art telemedicine, robotic and mobile smart card technology.

Entrepreneur Burgess Owens created the company and has focused on bringing the latest smart card and mobile technologies to the US healthcare market. EHS holds the exclusive US distribution license for Med-O-Card. The HIPAA Compliant MED-O-CARD is capable of storing in one location, all of a patient's data, providing a complete medical profile. This accumulated data will prove extremely valuable in providing a patient instant personal medical records.

Mr. Owens has transitioned from Super Bowl champion to a businessman and philanthropist who has shown a great interest in supporting the health and wellbeing of his fellow NFL player of his era.

"Med-O-Card is pleased to team with Pertexa to bring the latest medical software and robotics to our clients through the application of the latest telehealth technologies. I see this unique combination of telehealth applications being utilized by many industries. Personally, I am most excited about telehealth technology use in sports at all levels, high school, college and professional." said Owens.

About Pertexa:

Pertexa, Inc. is a next-generation medical technology company headquartered in Ridgecrest, California that creates and distributes advanced technology including RITA and RADEKAL, the nation's leading Physician's Productivity Tool, which has been shown to increase productivity by 30%. By combining both hardware and app development for worldwide medical use, Pertexa is an innovative brain trust, advancing disruptive transformational technologies for an evolving healthcare environment.
